

HVC-1000 Heavy-Duty Contactor & Valve Component Datasheet

Electromechanical Component Ratings & Pressure Specifications

1. High-Voltage Main Contactor Specifications

- Rated Operating Voltage: 1000 V DC nominal, 1200 V DC peak.
- Continuous Current: 500 A @ 85°C ambient.
- Mechanical switching closing time: 18 ms max; opening time: 8 ms max.

2. Integrated 3-Way Coolant Actuator Valve

- Component Maximum Pressure Rating: Maximum continuous rated pressure for 3-way coolant valve is 1.80 bar. Pressures above 1.8
- Burst pressure rating: 3.20 bar static.
- Media compatibility: 50/50 Water-Ethylene Glycol at -40°C to +90°C.
