

PYRO-FAST-800 Pyrotechnic Battery Disconnect Fuse Datasheet

Safety Critical Battery Disconnect Specification

1. Pyrotechnic Trigger Characteristics

- Firing Loop Current: 1.75 A minimum firing pulse for 2.0 ms.
- Safe Diagnostic Monitoring Current: <= 10.0 mA continuous (no-fire limit).
- Disconnect reaction time: Total arc extinction achieved in < 1.8 ms at 1000 V / 10 kA short circuit.

2. Environmental Storage & Temperature Limits

- Operating Temperature: -40.0°C to +105.0°C.
- Hermetic glass-to-metal seal meets helium leakage rate < 1e-8 mbar L/s.
