

PWR-MOD-1200 Dual IGBT & DC-DC Power Stage Datasheet

Power Semiconductor Electrical Characteristics

1. DC-DC Converter Secondary Power Stage

- Low-Voltage Output Current Rating:
- Maximum continuous rated LV current output is 180.0 A at 65°C ambient due to inductor thermal saturation limit.
- Peak pulse output current: 220 A for ≤ 5 seconds.

2. Main Inverter IGBT Half-Bridge Ratings

- Collector-Emitter Breakdown Voltage V_{ces} : 1200 V.
- Continuous Collector Current I_c : 600 A @ $T_c=75^\circ\text{C}$.
- Thermal resistance junction to heatsink: $R_{th_j-s} = 0.082 \text{ K/W}$.
