

Electromagnetic Compatibility (EMC) Test Report

Anechoic Chamber Radiated Emissions & Immunity per CISPR 25 Class 4

1. Radiated Emissions Measurement Sweep

- Test Case TC-EMC-091: Semi-anechoic chamber radiated emissions sweep 150 kHz-2.5 GHz: all frequency peaks remained ≥ 6.4 dB
- Polarization: Horizontal and Vertical antenna orientations evaluated.
- Detector modes: Peak, Quasi-Peak, and Average detector sweeps all verified.
