

Electrical Transient & Supply Voltage Overvoltage Test Report

Pulse Transients per ISO 7637-2 and Jump Start per ISO 16750-2

1. ISO 16750-2 Jump Start Supply Overvoltage

- Test Case TC-PWR-092: Jump start simulation: 26.0 V DC applied for 60.0 seconds; no thermal runaway or parametric drift observed.

2. ISO 7637-2 Fast Transient Immunity (Pulses 3a / 3b)

- Test Case TC-PWR-096: Electrical transient test: application of Pulse 3a (-150 V) caused microcontroller reset (Class C behavior), viol
