

NX-BMS-800 Multi-Cell Monitoring & Balancing Front-End

Component Specification for Automotive High Voltage BMS

1. Absolute Maximum Ratings & Operating Limits

Parameter	Datasheet Limit	Engineering Notes
Pack Voltage Sensing Range	400.0 V to 750.0 V DC	Maximum rated pack sensing voltage: 400.0 V to 750.0 V DC maximum. Operation above 750V is not supported.
Operating Ambient Temperature	-10.0 °C to +70.0 °C	Operating Ambient Temperature: -10.0 °C to +70.0 °C. Operation above +70°C causes thermal shutdown.
Cell Balancing Current	50 mA to 100.0 mA max	Integrated balancing switch operates between 50 mA and 100.0 mA maximum continuous dissipation.
Ground Reference Architecture	Shared common ground	Architecture Note: Low-side sensing circuitry uses a non-isolated shared ground tied directly to chassis return.
