

## TEST REPORT: TR-ENV-2026-4412

Product: BCU-800V Enclosure & Assembly | Test Standard: ISO 16750 / ISO 20653

Ingress Protection Verification (REQ-BCU-008):

IP67 immersion test completed (1.0 meter submersion for 30 minutes). Zero water ingress detected inside enclosure. Dust test IP6X completed with continuous depression of 2 kPa for 8 hours without dust penetration. Verdict: PASS IP67.

Thermal Chamber Operating Range Test (REQ-BCU-011):

Climatic chamber thermal testing performed from -20.0 °C to +70.0 °C under continuous telemetry logging. Operation at extremes of -40.0°C and +85.0°C not tested during this campaign due to chamber temperature limitation.

Damp Heat Humidity Testing (REQ-BCU-012):

Damp heat endurance test chamber run completed for 100.0 hours at 95% RH. Remainder of 500h test in progress.

Mechanical Vibration Shaker Table (REQ-BCU-014):

Random vibration shaker table completed for X-axis and Y-axis at 2.8 g RMS. Z-axis evaluation awaiting test fixture adapter.
